

VpCI™ METALWORKING PRODUCTS

BioCorr Rust Preventative

PRODUCT DESCRIPTION

BioCorr Rust Preventative is a waterbased, biodegradable rust preventative that is intended for preservation of metals in storage and during transportation. BioCorr Rust Preventative provides multi-metal protection and is an excellent environmentally sound alternative to petroleum derived products. This ready-to-use formulation can provide protection for up to two years of indoor storage, or during shipments when combined with VpCI packaging materials. Unlike rust preventative oils, this product leaves a dry film on the surface of the metal which is virtually undetectable. This feature helps to create a clean workplace, and prevents material waste. BioCorr Rust Preventative is VOC free, and the formulation is biodegradable, eliminating expensive disposal costs associated with oils.
